Birdcage Spud

0.5 in Hole Diameter · 1.625 in Length · Aluminum · Black Anodized · Ti22 Sprint Car Birdcage

PART NUMBER
TIP2100
View on PriceGuidePro ›

OVERVIEW

The birdcage spud is the pickup point that connects the Jacob's Ladder or radius rod to the cage, taking suspension load directly. A worn or bent spud changes geometry and adds slop where precision matters. Replacement spuds let you refresh a cage rather than replacing it.

Hardware is a wear item on a rotating assembly, so periodic renewal is normal.

Replacement birdcage component. Upper Pickup Cone. Fits Pro Birdcages.

Ti22's Pro Birdcages are machined from 7075-T6 aluminum with a 28mm double-row angular contact bearing. The line features standard right and left cages, as well as the new Adjustable Birdcage. The adjustable feature allows for adjustment of the Jacob's Ladder pick-up point to meet changing track conditions, giving racers a competitive edge.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Diameter	**0.5 Inch Hole Diameter**
Fits Application	**Ti22 Sprint Car Birdcage**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**4 × 3.05 × 1.55 in**
Ship Weight	**0.08 lb**
