Wheel Hub Seal Shim

Inner · Steel · Cadmium · Ti22 Wheel Hub Seal

PART NUMBER
TIP2818
View on PriceGuidePro ›

OVERVIEW

Seal shims set the correct depth for a hub seal so it rides on the intended surface. A seal sitting too deep or shallow will not seal and wears a groove in the wrong place. Thin steel shims let you adjust that depth precisely.

Shims are used with specific seals, so matching matters.

Double Lip Oil Seal Shim, 0.009 Inch.

SPECIFICATIONS

Material	**Steel**
