Spindle Shim

0.030 in Thick · Steel · Natural · MPD Sprint Car Spindle

PART NUMBER
TIP2847
View on PriceGuidePro ›

OVERVIEW

Spindle shims set bearing preload and endplay in the front hub, which determines bearing life and how freely the wheel turns. Too tight and the bearing overheats, too loose and it hammers itself apart. Multiple thicknesses let you dial preload precisely.

Shim kits are standard front end service items.

0.030 Inch Steel Spindle Shim Kit.

SPECIFICATIONS

Material	**Steel**
Finish	**Natural**
