Spindle

Passenger Side · Greasable · Keyed Washer / Nut / Spacers Included · Aluminum · Natural · Micro / Mini Sprint

PART NUMBER
TIP3521
View on PriceGuidePro ›

OVERVIEW

The spindle carries the front wheel bearing, brake, and steering loads, making it one of the most safety-critical parts on the car. It also sits at the far end of the suspension where every ounce affects how quickly the front end responds. Forged and machined construction handles impact loads while keeping mass in check.

Correct camber and caster angles are built in, so the geometry is right from the box.

CNC-machined from rigid 6061-T6 billet aluminum, spindles include a machined aluminum snout. Plain finish.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Natural**
Style	**Greasable**
Location	**Passenger Side**
Vehicle Type	**Micro / Mini Sprint**
Hardware Included	**Keyed Washer / Nut / Spacers**
Sold As	**Kit**

WHAT'S INCLUDED

- ✔ Keyed Washer
- ✔ Nut
- ✔ Spacers
