Brake Caliper Bracket

Front · Driver Side · Hardware Included · Aluminum · Black Anodized · 10-7/8 in Rotor · 3-1/4 in Lug Mount Calipers · Sprint Car Spindles

PART NUMBER
TIP4010
View on PriceGuidePro ›

OVERVIEW

Caliper brackets locate the brake caliper relative to the rotor, holding it square under the full force of every stop. A bracket that flexes causes uneven pad wear and an inconsistent pedal. Billet aluminum construction handles braking loads while keeping weight off the unsprung corner.

Correct spacing for your rotor diameter is what makes the caliper sit right.

Caliper mounts are spaced at 3-1/4 Inch and will work with 10-1/8 Inch and 10-7/8 Inch rotors. Steel mounting bolts included.
