Brake Caliper Bracket

Front · Driver Side · Hardware Included · Aluminum · Clear Anodized · 10-7/8 in Rotor · 3-1/4 in Lug Mount Calipers · Sprint Car Spindles

PART NUMBER
TIP4011
View on PriceGuidePro ›

OVERVIEW

Caliper brackets locate the brake caliper relative to the rotor, holding it square under the full force of every stop. A bracket that flexes causes uneven pad wear and an inconsistent pedal. Billet aluminum construction handles braking loads while keeping weight off the unsprung corner.

Correct spacing for your rotor diameter is what makes the caliper sit right.

Heavy-duty aluminum bolt-on front brake caliper mounts fit 3-1/4 Inch lug mount calipers. Available for 10 Inch or 11 Inch rotors and with black or clear anodized finish. Sold each.
