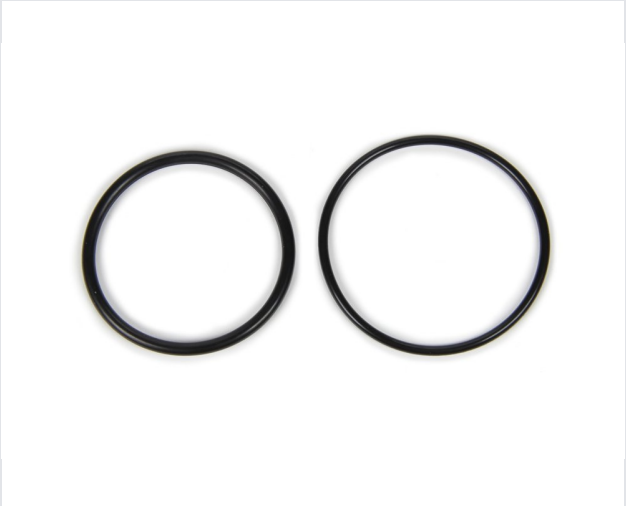
GASKETS AND SEALS › O-RINGS, GROMMETS AND VACUUM CAPS › O-RINGS

O-Ring

Rubber · TI22 In-Line Fuel Filters

PART NUMBER
TIP5523
View on PriceGuidePro ›



OVERVIEW

O-rings seal fittings, dust caps, and filter housings, and a single failed ring means a leak or contamination path. They are the cheapest part in any assembly and the most common cause of a leak. Correct material and size are what let the ring seal without extruding.

Always replaced rather than reused during service.

Replacement O-Ring Kit for TIP5526 / TIP5528.
