PART NUMBER

Axle Tether

MPD10508

King Pin to King Pin · Hardware Included · 56 in Axles

OVERVIEW

King pin to king pin tether kit for 56 Inch axles, the longest in the MPD range and typically used on wider front-end setups. Supplied with studs as well as the standard hardware, so the king pin mounting points are covered without a separate stud order. Measure the axle before ordering to confirm this is the correct length.

This king pin to king pin axle tether kit is designed for 56 Inch axles and is required by World of Outlaws and many other Sprint Car sanctioning bodies and tracks. Helps retain the axle in the event of a failure or disconnection. Hardware is included, sold as a kit.

SPECIFICATIONS

Location / Position	King Pin
