Axle Clamp Hardware

2 Bolts / 2 Nuts / 2 Washers · Steel · Black Oxide · MPD Axle Tether Brackets

OVERVIEW

Replacement hardware for MPD axle tether brackets, supplying the two bolts, two nuts and two washers that clamp one bracket to the axle tube. Tether hardware is regularly removed and reinstalled when swapping front axles, and threads eventually gall or stretch, so a spare set in the trailer avoids a scramble at the track. Steel with a black oxide finish.

Replacement hardware kit for MPD axle tether brackets. Includes 2 bolts, 2 nuts, and 2 washers in black oxide steel for secure clamp installation. Sold as a kit.

SPECIFICATIONS

Location / Position	**Axle**
Material	**Steel**
Color	**Black**
