Hub Bearing Spacer

Aluminum · Black Anodized · Sprint Car

OVERVIEW

Bearing spacer for sprint car front hubs, using a patented design that improves wheel spin by 1200 percent while reducing bearing drag. Free-rolling wheels mean less power lost to friction, which shows up as speed down the straight rather than heat in the hub. Machined from aluminum with a black anodized finish.

Hub bearing spacer machined from aluminum with a black anodized finish. Bearing spacers feature a patented design that improves wheel spin by 1200 percent and reduces bearing maintenance and wear. Threaded adjustment makes setting end play or preload easy.

Also reduces bearing friction and lowers bearing temperature. Suits Sprint and Midget front hubs. Sold individually.

SPECIFICATIONS

Material	**Aluminum**
Color	**Black**
Finish	**Anodized**
Inside Diameter	**1.194"**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**3.95 × 2.75 × 1.25 in**
Ship Weight	**0.06 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
