

Spindle

MPD14120

Stepped Snout · Front · Steel Snout · Aluminum · Black Anodized · Pavement Sprint

OVERVIEW

Pavement sprint spindle built for the one nut hub, using a Ford pin and a stepped snout for correct bearing fitment. Matching spindle to hub type is not optional here, as a one nut hub will not mount on a spindle cut for a six pin setup. Aluminum body with a steel snout and black anodized finish.

This MPD front spindle is designed for pavement Sprint Car applications and features a stepped snout for proper component fitment. It combines a durable steel snout with a lightweight aluminum body, finished in black anodizing for added corrosion resistance. Built for strength and reliability in high performance racing conditions.

Uses a Ford pin for one nut hub applications. Sold individually.

SPECIFICATIONS

Location / Position	Front
Material	Aluminum
Color	Black
Finish	Anodized
Sold As	Each
