King Pin Thrust Bearing

Roller · Steel · Sprint Car

OVERVIEW

Complete king pin thrust bearing kit for MPD sprint car spindles, supplying two needle thrust bearings along with a full range of shims. The thrust bearing carries the vertical load of the car through the king pin while still letting the spindle turn freely, and the shims are how that stack is set to the correct clearance. Having every shim thickness in one kit means the job can be finished in one session rather than waiting on a size.

MPD's Spindle Thrust Bearing Kit with Shims contains the following: 2 needle thrust bearings, 4 × 0.030 Inch shims, 3 × 0.010 Inch shims, 2 × 0.007 Inch shims and 3 × 0.005 Inch shims. Steel roller king pin thrust bearing for Sprint Car spindles. Sold as a kit.
