Spindle Shim

0.005 in Thick · Steel · Natural · MPD Sprint Car Spindle

OVERVIEW

Spindle shims at 0.005 Inch, the thinnest in the MPD range and the one used for final adjustment once thicker shims have taken up most of the clearance. Getting king pin clearance right matters because too tight binds the steering and too loose lets the spindle move under braking. Steel with a natural finish, pack of 10.

Spindle shim measuring 0.005 Inch thick, machined from steel with a natural finish. Used to set spindle and king pin clearance on MPD Sprint Car spindles. Sold as a pack of 10.

SPECIFICATIONS

Material	**Steel**
Color	**Natural**
Finish	**Natural**
Thickness	**0.005"**
Sold As	**Set of 10**

SHIPPING & PACKAGING
