PART NUMBER

Wheel Hub

MPD16000

Sprint · Front · Hub / Bearings / Hardware / Seal / Studs Included · Aluminum · Black Anodized

OVERVIEW

Complete front hub for sprint cars using the one nut design, supplied assembled with bearings, seal, studs and hardware so it can go straight on the car. The one nut hub trades the six individual lug nuts for a single center nut, which turns a wheel change into a much faster job when track time is limited. Machined from aluminum with a black anodized finish.

Lightweight and race-ready, this front Sprint Car wheel hub is machined from durable aluminum with a black anodized finish for strength and corrosion resistance. The complete kit includes bearings, races, seal, dust cap, wheel studs and hardware. One nut design with a 6 pin wheel bolt pattern.
