PART NUMBER

Pressure Plate

MPD16400

6 Pin · Aluminum · Natural · Sprint Hub

OVERVIEW

Pressure plate for asphalt sprint car front hubs, machined from aluminum and weighing just 1.07 pounds. The pressure plate clamps the wheel to the six pin drive, and keeping this component light pays back twice because it is both rotating and unsprung mass. Natural finish.

This aluminum 6-pin pressure plate is built specifically for Asphalt Sprint Cars and weighs just 1.07 pounds. Supplied with a natural finish. Lightweight, durable, and ready for the track.
