PART NUMBER

Torsion Bar Stop

MPD17200

1-3/4 in Split · Hardware Included · Aluminum · Black Anodized · Sprint Car

OVERVIEW

Aluminum torsion stop with a 1-3/4 Inch split, machined from 6061 and supplied with a steel bolt and jam nut. The stop clamps to the torsion bar and sets the arm preload, which is how ride height and corner weight are dialed in. Aluminum is the lightest of the three MPD stop materials.

Black anodized, sold individually.

Torsion stops are available in 1-3/4 Inch split. Aluminum stops are made from 6061 and include a steel bolt with jam nut. This version is machined from aluminum with a black anodized finish, fits a 1.75 Inch 48 spline torsion bar, and includes hardware with a hex head stop bolt and steel jam nut.

SPECIFICATIONS
