Spark Plug Guard

Aluminum · Black Anodized · Sprint Car

OVERVIEW

Spark plug guards in lightweight aluminum, with brackets that bolt to the headers. Mud and rocks thrown up on a dirt track can foul or break a plug, and losing a cylinder mid race for the sake of an unprotected plug is an avoidable way to end a night. Complete set in black finish.

Don't let mud or rocks ruin your race. These lightweight aluminum spark plug guards have brackets that bolt to your headers with 2 quick-connect fasteners. Kit includes right and left guard, two front, and two rear mounting brackets.

Black anodized aluminum. Sold as a kit.

SPECIFICATIONS
