Torque Tube

PART NUMBER
MPD21610

24 in Long · 2.99 in OD · Aluminum · Black / Silver · Midget

OVERVIEW

Midget torque tube built to take a sprint style torque ball, at 24 Inch long and 2.990 Inch outside diameter rather than the usual midget 2.300 Inch. This is the tube to order when a midget is running the larger sprint ball, and the diameter difference makes it easy to identify. Anodized aluminum with 0.005 Inch clearance.

MPD Midget torque tube and collar assemblies allow 0.005 Inch clearance for the torque ball. The torque collar has two six-hole patterns on a 4 Inch bolt circle, with one set of holes for 5/16 Inch studs and the other for 3/8 Inch studs. This is the 24 Inch torque tube and collar in the larger 2.990 Inch OD Sprint style ball size, 4.60 pounds.

SPECIFICATIONS

Material	**Aluminum**
Color	**Black**
Length	**24"**
Outside Diameter	**2.990"**
Sold As	**Each**

SHIPPING & PACKAGING

Package	**30.5 × 6.25 × 6.25 in**
Ship Weight	**7.96 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
