PART NUMBER

Steering Arm

MPD28250

Passenger Side · 3 in Bolt Span · Aluminum · Black Anodized · Midget

OVERVIEW

Passenger side midget steering arm with a 3 Inch bolt span, machined from billet aluminum and black anodized. Fits all midget steering applications with 7/16-20 Inch threaded mounting. The steering arm sets the geometry between tie rod and king pin, so arm choice affects how much Ackermann the front end runs.

MPD steering arms are made of a high-quality billet aluminum. These arms work on all Midget steering applications and have 7/16-20 Inch threaded mounting holes. This is the standard steering arm in black anodized with a 3 Inch bolt span.
