PART NUMBER

Steering Arm

MPD28251

Passenger Side · 3 in Bolt Span · Aluminum · Natural · Midget

OVERVIEW

The natural finish version of the MPD passenger side midget steering arm, 3 Inch bolt span with 7/16-20 Inch threaded mounts. An unanodized surface makes it easier to spot a crack starting during a between-race inspection, which is why some teams run natural on highly loaded steering parts. Billet aluminum, sold individually.

MPD steering arms are made of a high-quality billet aluminum. These arms work on all Midget steering applications and have 7/16-20 Inch threaded mounting holes. This is the standard steering arm with a natural finish and a 3 Inch bolt span.
