PART NUMBER

Steering Arm

MPD28270

Combo · Aluminum · Black Anodized · Midget

OVERVIEW

Combo steering arm for midgets, black anodized billet aluminum with 7/16-20 Inch threaded mounting. The combo design puts more than one tie rod mounting position on a single arm, so steering geometry can be changed by moving the rod rather than buying another arm. Works across midget steering applications.

MPD steering arms are made of a high-quality billet aluminum. These arms work on all Midget steering applications and have 7/16-20 Inch threaded mounting holes. This is the combo steering arm in black anodized.
