PART NUMBER

Brake Caliper Bracket

MPD28310

Top Mount · DMI Style · Aluminum · Black Anodized

OVERVIEW

Top mount version of the DMI style caliper bracket, positioning the caliper above the axle rather than ahead of it. Top mounting is often chosen for clearance reasons, keeping the caliper away from radius rods and steering components on a tight front end. Machined from aluminum with a black anodized finish and built for 10-1/8 Inch rotors.

Aluminum front brake mounts are built for 10-1/8 Inch rotors and come in a variety of styles. This is the DMI-style top mount brake bracket in black anodized. Sold as a kit.

SPECIFICATIONS
