PART NUMBER

Pitman Arm

MPD28345

10 to 11 in Long · Angle Broach · Aluminum · Black Anodized · Sprint Car

OVERVIEW

Angle broach pitman arm in the 10 to 11 Inch length. The angle broach changes how the arm sits on the steering box shaft, which alters the arc the arm sweeps through and lets you correct steering geometry that a straight arm cannot. Same length range as the straight version, so it is chosen for geometry rather than ratio.

Black anodized aluminum, sold individually.

MPD offers a variety of different styles of Pitman arms to make sure you get the correct feel of the race car. This is the angle broach Pitman arm in black anodized aluminum with 10 Inch and 11 Inch holes. Sold individually.
