PART NUMBER

Spindle

MPD28414

Aluminum Body · 10 Degree Titanium Snout · Steel Locknut Included · 2 Ear · Aluminum / Titanium · Black Anodized / Natural · Midget

OVERVIEW

Two ear right hand midget spindle with a titanium snout in place of steel, on the same billet 2024-T3 aluminum body. Titanium removes weight at the outer end of the spindle, the worst place on the car to carry mass because it is both unsprung and at the end of a lever arm. Steel locknut included.

Black finish, sold individually.

MPD Midget spindles are produced from billet 2024-T3 aluminum and are offered with both steel and titanium shafts. They come complete with spindle lock nuts. This is the 2 ear version with a 10 Degree titanium snout, black anodized body and natural titanium shaft.
