King Pin Bushing

Brass · Natural · Midget

OVERVIEW

Midget king pin bushings machined from brass, supplied as a set of four so both sides can be done at once. Brass is used because it wears in preference to the steel king pin, making the cheap part the sacrificial one. Worn bushings show up as play in the steering that no amount of tie rod adjustment will remove.

Natural finish, sold as a set of 4.

Midget king pin bushings machined from brass with a natural finish. Sold as a set of 4.

SPECIFICATIONS

Material	**Brass**
Color	**Natural**
Finish	**Natural**
Sold As	**Set of 4**
