Reamer

PART NUMBER
MPD30130

1.125 in/ft Taper · Aluminum · Black Anodized · Torsion Bar · Sprint Car

OVERVIEW

Torsion bar reamer with a 1.125 Inch taper for sprint cars, built around a 4340 tool steel industrial cutter. Reaming the torsion tube to the correct taper is what lets the bar seat fully, and a bar that does not seat properly will not deliver its rated spring rate. Sold individually.

Torsion Bar Reamer is manufactured for accuracy. The heart of the Reamer is its 4340 tool steel industrial cutter. Each flute is precision ground for perfect cutting and accuracy.

The stem is made to come apart so it's easy to store. Machined at the handle end is a 3/4 Inch hex so you can easily cut through your bushings. Supplied with a 1.125 Inch per foot taper for Sprint Car bars.

SPECIFICATIONS

Material	**Aluminum**
Color	**Black**
Finish	**Anodized**
Sold As	**Kit**
