PART NUMBER

Birdcage

MPD81120

Driver Side · 2.750 in ID Bearing · Double Bearing · Hardware Included · Aluminum · Black Anodized · Sprint Car

OVERVIEW

Pavement sprint birdcage for the driver side, machined from 7075 billet for strength with weight savings. Uses a double bearing arrangement rather than single, spreading axle load across two bearings for the sustained high cornering loads pavement racing generates. Fits Beast and Hurricane chassis, 2.750 Inch bearing bore, hardware included.

This state-of-the-art Sprint Car birdcage is designed with strength in mind, but still emphasizes weight savings. The 7075 billet aluminum birdcage needs no bolt-on hardware, giving it maximum strength. These cages fit most asphalt cars including Beast and Hurricane chassis.

This is the left hand cage with 2.750 Inch ID double bearing. Sold individually.

SPECIFICATIONS

Location / Position	Driver Side
