Birdcage

Passenger Side · 2.750 in ID Bearing · Double Bearing · Double Shear · Hardware Included · Aluminum · Black Anodized · Sprint Car

OVERVIEW

Passenger side pavement sprint birdcage in 7075 billet with a double bearing setup and double shear mounting. Double shear supports the mounting bolt at both ends instead of one, which is the stronger arrangement for the loads a pavement car generates. Beast and Hurricane fitment, 2.750 Inch bearing bore.

This state-of-the-art Sprint Car birdcage is designed with strength in mind, but still emphasizes weight savings. The 7075 billet aluminum birdcage needs no bolt-on hardware, giving it maximum strength. These cages fit most asphalt cars including Beast and Hurricane chassis.

This is the right hand cage with 2.750 Inch ID double bearing and double shear design. Sold individually.

SPECIFICATIONS

Location / Position	**Passenger Side**
Material	**Aluminum**
