Panhard Bar Bracket

Frame Mount · Clamp-On · Aluminum · Black Anodized · 1-1/8 in Tubing

OVERVIEW

Panhard bar bracket that clamps to 1-1/8 Inch frame tubing, giving a mounting point for the panhard bar without welding to the chassis. Because it clamps rather than welds, the bracket can be repositioned to change panhard bar height, which is one of the quicker ways to adjust roll center and how the car takes bite off the corner. Machined from aluminum with a black anodized finish, mounting hardware included.
