PART NUMBER

Torsion Arm

MPD82004

Front · Driver Side · S-Bend · 1-1/8 in x 48 Spline · 19.25 in Long · Hardware Included · Aluminum · Black Anodized · Sprint Car

OVERVIEW

Left front torsion arm with an S-bend, 19.25 Inch long on 1-1/8 by 48 spline. The S-bend provides clearance for chassis components that a straight arm would contact, letting the arm run where the geometry needs it rather than where the frame allows. 2024 aluminum, hardware included, black finish.

MPD torsion arms are constructed of high-strength 2024 aluminum. The arms have been precisely radiused to reduce excess weight while maintaining strength and durability. The left S-Bend allows for more oversteer clearance on the left front tire.

This is the front driver side S-Bend arm, 1-1/8 Inch x 48 spline, 19-1/4 Inch long, black anodized with hardware included. Sold individually.

SPECIFICATIONS

Location / Position	Front - Driver Side
Material	Aluminum
Color	Black
Finish	Anodized
