PART NUMBER

# Torsion Arm

**MPD82030**

Front · Driver Side · S-Bend · 1-1/8 in x 48 Spline · 19.5 in Long · Hardware Included · Aluminum · Black Anodized · Sprint Car

## OVERVIEW

Left front S-bend torsion arm machined from 7075 billet rather than 2024 aluminum. The 7075 alloy is significantly stronger, which suits teams running high loads or wanting extra margin on a highly stressed arm. 19.5 Inch on 1-1/8 by 48 spline, S-bend for chassis clearance.

Black finish, hardware included.

Precision-machined from high-strength 7075 billet aluminum, these torsion arms are engineered to deliver maximum durability and performance. By reducing deflection, twisting, and bending under load, they ensure the torsion bar maintains a consistent rate without energy being lost to flex in the arm. Ideal for both winged and non-wing Sprint Cars, these arms provide the strength and stability serious racers demand.

This is the S-Bend left front arm, 1-1/8 Inch x 48 spline, 19-1/2 Inch long, black. Sold individually.

## SPECIFICATIONS

|                     |                     |
