Axle Spacer Kit

Two 0.25 / Four 0.5 in Straight · One 0.500 in Male Cone · One 0.625 in Female Cone · Aluminum · 31-Spline · Midget

OVERVIEW

Axle spacer system cut for 31 spline midget axles. The suffix denotes spline count, not quantity, so match it to the axle in your car because a 31 spline cone will not fit a 36 spline axle. Uses the same split cone principle that lets wheel position be changed without searching for individual spacers.

Black anodized aluminum, supplied as a complete kit.

MPD Racing's axle spacer system uses a split cone spacer which allows moving the wheel in or out without going back to look for the right size spacer. Once the spacing is correct, simply move the existing spacers from the inside of the wheel to the center of the split cone or vice versa. Kit includes male cone for the wheel center and female cone for the wheel nut, (2) 1/4 Inch and (4) 1/2 Inch spacers.

This is the 31-spline version for Midget applications. Black anodized aluminum. Made in the USA.

SPECIFICATIONS

Location / Position	**Rear**
Material	**Aluminum**
Color	**Black**
Finish	**Anodized**
Spline Size	**31 Spline**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**11 × 8.05 × 1.05 in**
Ship Weight	**0.96 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
