Axle Spacer Kit

Two 0.25 / Four 0.5 in Straight · One 0.500 in Male Cone · One 0.625 in Female Cone · Aluminum · 36-Spline · Midget

OVERVIEW

The 36 spline midget version of the MPD axle spacer system. Confirm your axle spline count before ordering, as 31 and 36 spline components look similar but will not interchange. Split cone design allows wheel position changes by relocating spacers rather than swapping them out.

Black anodized aluminum, complete kit.

MPD Racing's axle spacer system uses a split cone spacer which allows moving the wheel in or out without going back to look for the right size spacer. Once the spacing is correct, simply move the existing spacers from the inside of the wheel to the center of the split cone or vice versa. Kit includes male cone for the wheel center and female cone for the wheel nut, (2) 1/4 Inch and (4) 1/2 Inch spacers.

This is the 36-spline version for Midget applications. Black anodized aluminum. Made in the USA.

SPECIFICATIONS

Location / Position	**Rear**
Material	**Aluminum**
Color	**Black**
Finish	**Anodized**
Spline Size	**36 Spline**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**11.1 × 8.1 × 1 in**
