Axle Spacer Kit

Two 0.25 / Four 0.5 in Straight · One 0.500 in Male Cone · One 0.625 in Female Cone · Aluminum · Sprint Car

OVERVIEW

The split cone design is what separates this from a box of loose spacers. Instead of pulling the wheel and hunting for the right thickness, the cone splits so spacers move from inside the wheel to the center of the cone, changing wheel position without a jack handle and a parts search. This is the 42 spline sprint car version.

Kit includes male and female cones plus a range of straight spacers. Made in the USA.

MPD Racing's axle spacer system uses a split cone spacer which allows moving the wheel in or out without going back to look for the right size spacer. Once the spacing is correct, simply move the existing spacers from the inside of the wheel to the center of the split cone or vice versa. Kit includes male cone for the wheel center and female cone for the wheel nut, (2) 1/4 Inch and (4) 1/2 Inch spacers.

Some cars may require an additional spacer between the system and the birdcage. Black anodized aluminum. Made in the USA.

SPECIFICATIONS

Location / Position	**Rear**
Material	**Aluminum**
Color	**Black**
Finish	**Anodized**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**11.05 × 8.05 × 1.05 in**
Ship Weight	**1.20 lb**
Country of Origin	**USA**
Vehicle Type	**Car**

ALSO AVAILABLE IN THIS FAMILY (3 PART NUMBERS)

Part #	Spline Size	Ship Wt.
MPD87200-31	31 Spline	0.96 lb
MPD87200-36	36 Spline	0.92 lb
