## OVERVIEW

Beadlock bolts carry the entire clamping load that keeps a tire bead pinched between the wheel ring and the rim, which means every one of them is a wear item you will remove and reinstall dozens of times a season. Swapping the factory steel hardware for titanium takes meaningful mass off the outer edge of the wheel, where rotating weight costs the most. Titanium also shrugs off the mud, water, and pressure washing that turns steel bolt heads into rounded-off scrap.

This kit gives you a complete set so you are not mixing old and new fasteners around a single ring.

Titanium bolt kit includes (16) lightweight 5/16 Inch-18 x 1 Inch long hex-head bolts for added weight savings.

## SPECIFICATIONS

| | |
|---|---|
| Material | **Titanium** |
| Finish | **Natural** |
| Thread | **5/16-18** |
| Head Style | **Hex Head** |
| Product Length | **1 Inch** |
| Sold As | **Set of 16** |

## SHIPPING & PACKAGING

| | |
|---|---|
| Package | **4.2 × 2.45 × 0.95 in** |
| Ship Weight | **0.25 lb** |
| Country of Origin | **USA** |
| Vehicle Type | **Car** |
