Shock Mount Stud

1/2-20 in Thread · 2 in Long · Four Locking Nuts / Studs Included · Titanium · Natural · Sprint Car

PART NUMBER
TIP1060
View on PriceGuidePro ›

OVERVIEW

Shock mount studs anchor the shock to the chassis or axle, taking every compression and rebound load the suspension generates. A stud that fails or loosens lets the shock move, changing damping behavior instantly. Locking nut designs resist the vibration that walks ordinary hardware loose.

Titanium options cut weight at a mounting point that sees constant cycling.

Shock stud kit includes (4) studs and (4) nylon locking half-nuts to mount shock to chassis or front axle. 2 Inch studs have 1/2 Inch-20 threads that thread directly into pre-threaded bungs.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Thread	**1/2-20**
Product Length	**2 Inch**
Vehicle Type	**Sprint Car**
Hardware Included	**Four Locking Nuts / Studs**
Sold As	**Kit**

WHAT'S INCLUDED

- ✔ Four Locking Nuts
- ✔ Studs
