Nerf Bar / Bumper Fastener

10-32 Thread · 1.5 in Long · Nuts Included · Titanium · Natural · Sprint Car

PART NUMBER
TIP1102
View on PriceGuidePro ›

OVERVIEW

These fasteners hold nerf bars and bumpers to the chassis, taking the direct load of every contact those parts are designed to absorb. A fastener that shears leaves a bar hanging, which is worse than no bar. Correct grade and length are what let them carry impact loads.

Titanium options reduce weight on parts hung off the chassis perimeter.

Kit contains (14) #10-32 x 1-1/2 Inch hex-head bolts and (14) nylon lock nuts for mounting bumpers or nerf bars.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Thread	**10-32**
Product Length	**1.5 Inch**
Vehicle Type	**Sprint Car**
Hardware Included	**Nuts**
Sold As	**Kit**

WHAT'S INCLUDED

- ✔ Nuts
