OVERVIEW

Header studs anchor the header to the head, taking heat cycling and vibration continuously. A stud that seizes or breaks turns a header change into a head removal. Correct base and top thread combinations let the stud thread into the head while accepting a proper nut.

Studs are replaced whenever a header comes off for service.

Header stud kit bolts are 3/8 Inch-16 base thread with 3/8 Inch-24 top thread and are 1-1/2 Inch long. Set of (14) studs and (14) 12-point nuts.

SPECIFICATIONS

Material	**Titanium**
Finish	**Natural**
Thread	**3/8-16, 3/8-24**
Product Length	**1.25 Inch**
Sold As	**Set of 14**

SHIPPING & PACKAGING

Package	**4.05 × 3.2 × 1.2 in**
Ship Weight	**0.43 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
