# Fuel Pump Bolt Kit

Adapter / Pinch · Hex Head · Titanium · Natural · Sprint Car

PART NUMBER
**TIP1136**
View on PriceGuidePro ›

## OVERVIEW

The fuel pump bolt kit provides the specific fasteners that retain a mechanical fuel pump, which sees constant vibration from the engine drive. A loose pump bolt lets the pump move and can cost you fuel pressure. Correct grade and length are what hold it reliably.

Titanium options cut weight on a part hung off the engine.

Kit includes specialized, lightweight titanium hex-head fasteners to retain the fuel pump.

## SPECIFICATIONS

| | |
|---|---|
| Material | **Titanium** |
