Tie Rod and Drag Link Stud

1/2-20 in Thread · Button Head · Titanium · Natural

PART NUMBER
TIP1166
View on PriceGuidePro ›

OVERVIEW

These studs anchor the tie rod and drag link to the steering arms, carrying every steering load the driver applies. A failed stud means losing steering control. Low-profile Allen head designs clear the arm without requiring you to drill for clearance.

Titanium construction saves weight at the front of the car.

Specially designed and manufactured from lightweight titanium, low-profile Allen-head studs eliminate the need to drill out steering arms for clearance. 1/2 Inch-20 thread pattern. Sold in kit form or individually.

Tie Rod and Drag Link Stud, (1) Stud, (1) Nut, and (1) Spacer
