Radius Rod Stud

1/2-20 in Thread · 3.250 in Long · Hex Nuts Included · Steel / Titanium · Black Oxide / Natural

PART NUMBER
TIP1186
View on PriceGuidePro ›

OVERVIEW

Radius rod studs anchor the radius rods to the chassis and birdcage, carrying the fore and aft loads that control rear suspension movement. A failed stud frees a suspension link. Correct thread and length are what let the stud carry that load.

Titanium options save weight, and kits include the locking nuts needed.

Radius rod studs feature 1/2-20 threads and are 3-1/4 Inch long. Kit includes (6) one-nut studs and (12) nylon locking half-nuts.

SPECIFICATIONS
