Front Axle Assembly

2.5 in OD · 50 in Wide · 9 and 12 Degree Front Spindles · Chromoly · Natural · Sprint Car

PART NUMBER
TIP2010
View on PriceGuidePro ›

OVERVIEW

The front axle assembly ties both front wheels together and carries the spindles, shock mounts, and steering pickup points, making it the foundation the entire front setup is built on. Its width and built-in caster and camber angles determine how the car turns and how the front tires load. A straight, correctly angled axle is what lets a setup sheet mean anything.

Axles take direct impact in contact, so many teams keep a spare ready for a race weekend.

Front Axle Assemblies are 50 Inch and 51 Inch wide x 2-1/2 Inch O.D., with 9 Degree and 12 Degree front spindles and adjustable shock towers. Natural chromoly.

SPECIFICATIONS

Material	**Chromoly**
Finish	**Natural**
