Tether King Pin Kit

King Pin Studs / Nuts · Sprint Car Axle Tether Systems

PART NUMBER
TIP2019
View on PriceGuidePro ›

OVERVIEW

The tether king pin kit provides the studs and nuts that anchor a wheel tether at the king pin, which is what keeps a wheel with the car if a component fails. This is a required safety item at most sanctions. Titanium construction saves weight while meeting the strength needed.

Kits include the matched hardware so nothing is sourced separately.

These Ti22 Performance axle tethers are World Of Outlaws, Allstar, and Knoxville approved.
