Birdcage

Passenger Side · 2.760 in ID Bearing · Single Bearing · Hardware Included · Aluminum · Black Anodized · Sprint Car

PART NUMBER
TIP2028
View on PriceGuidePro ›

OVERVIEW

The birdcage is the rotating hub that ties the torsion arm, radius rods, and shock to the rear axle, so everything the chassis does on corner entry passes through it. A cage that flexes or binds bleeds off horsepower and dulls the driver's feel. Precision bearings and a machined billet housing keep those pickup points located exactly where the setup expects.

Sold side-specific, so the correct hand matters when ordering.

Standard sprint car birdcages are made from tough billet 6061-T6 aluminum then black anodized for corrosion resistance. Designed for maximum performance, these birdcages include an angular contact bearing, and come complete with a torsion arm bolt and a radius rod bolt. They feature a 5-1/4 Inch split between the radius rod and the torsion arm.

Left-side and right-side units sold individually.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Inside Diameter	**2.760 Inch**
Bearing Type	**Bearing, Single Bearing**
Location	**Passenger Side**
Vehicle Type	**Sprint Car**
Hardware Included	**Hardware**
