Birdcage Flag

Aluminum · Black Anodized · Ti22 Sprint Car Birdcage

PART NUMBER
TIP2030
View on PriceGuidePro ›

OVERVIEW

The birdcage flag is the tab that locates the shock or torsion link on the cage, carrying that load into the assembly. A bent flag changes the pickup point and quietly alters the setup. Replacement flags let you repair a cage after contact rather than replacing the whole assembly.

Keeping spares makes a damaged cage a repair instead of a purchase.

Replacement birdcage component for standard and non-wing cages. Bottom Flag. Standard sprint car birdcages are made from tough billet 6061-T6 aluminum then black anodized for corrosion resistance.

Designed for maximum performance, these birdcages include an angular contact bearing, and come complete with a torsion arm bolt and a radius rod bolt.

SPECIFICATIONS

Material	**Aluminum**
Finish	**Black Anodized**
Fits Application	**Ti22 Sprint Car Birdcage**
Sold As	**Each**

SHIPPING & PACKAGING
