Birdcage Spud

0.5 in Hole Diameter · 1.75 in Length · Aluminum · Black Anodized · Ti22 Sprint Car Birdcage

PART NUMBER

TIP2031

[View on PriceGuidePro >](#)

OVERVIEW

The birdcage spud is the pickup point that connects the Jacob's Ladder or radius rod to the cage, taking suspension load directly. A worn or bent spud changes geometry and adds slop where precision matters. Replacement spuds let you refresh a cage rather than replacing it.

Hardware is a wear item on a rotating assembly, so periodic renewal is normal.

Replacement birdcage component for standard and non-wing cages. Top Stand-Off. Standard sprint car birdcages are made from tough billet 6061-T6 aluminum then black anodized for corrosion resistance.

Designed for maximum performance, these birdcages include an angular contact bearing, and come complete with a torsion arm bolt and a radius rod bolt.

SPECIFICATIONS

Material	Aluminum
Finish	Black Anodized
Diameter	0.5 Inch Hole Diameter
Fits Application	Ti22 Sprint Car Birdcage
Sold As	Each

SHIPPING & PACKAGING

Package	4.2 x 2.35 x 1.2 in
Ship Weight	0.08 lb
Country of Origin	USA
Vehicle Type	Car

ALSO AVAILABLE IN THIS FAMILY (2 PART NUMBERS)
