Torsion Arm

Rear · Passenger Side · 16.375 in Long · Steel · Black Oxide · Sprint Car

PART NUMBER

TIP2330

[View on PriceGuidePro >](#)

OVERVIEW

The torsion arm transfers wheel movement into the torsion bar, making it the link that determines how each corner of the car carries load. Any flex or slop here shows up as inconsistent bite that no amount of setup change will fix. Precise machining keeps the spline and pickup points where the setup sheet expects them, lap after lap.

Arms take direct hits in contact, so a spare set in the trailer is cheap protection against a lost feature.

Torsion Arms (2330/2332) are made from 4130 steel; it won't change torsion bar rates but maintains flexibility. These arms stay strong even with high exhaust heat, reducing twisting under pressure.

SPECIFICATIONS

Material	Steel
Finish	Black Oxide
Product Length	16.375 Inch
Location	Rear - Passenger Side
Vehicle Type	Sprint Car
Sold As	Each

SHIPPING & PACKAGING

Package	18.5 x 4.5 x 4.5 in
Ship Weight	4.08 lb
Country of Origin	USA
Vehicle Type	Car
