Torsion Arm Stop

Aluminum / Steel · Black Anodized / Natural

PART NUMBER
TIP2350
View on PriceGuidePro ›

OVERVIEW

A torsion stop locks the torsion bar to the arm and sets the preload that determines how a corner carries weight, making it one of the most frequently adjusted parts on the car. A stop that slips or rounds its splines changes your setup mid-race with no obvious cause. Secure spline engagement and quality hardware are what keep the adjustment where you put it.

Stops get wrenched constantly, so material choice affects how long they stay accurate.

This kit holds torsion arm and stop in place if pinch bolts loosen or break. Black. Sold in pairs.

SPECIFICATIONS

Material	**Aluminum / Steel**
Finish	**Black Anodized / Natural**
Color	**Black / Natural**
Sold As	**Kit**

SHIPPING & PACKAGING

Package	**36 × 4 × 1.8 in**
Ship Weight	**0.96 lb**
Country of Origin	**USA**
Vehicle Type	**Car**
