Torsion Arm Stop

1-3/4 in Split · Hardware Included · Titanium · Natural · Sprint Car

PART NUMBER

TIP2384

[View on PriceGuidePro >](#)

OVERVIEW

A torsion stop locks the torsion bar to the arm and sets the preload that determines how a corner carries weight, making it one of the most frequently adjusted parts on the car. A stop that slips or rounds its splines changes your setup mid-race with no obvious cause. Secure spline engagement and quality hardware are what keep the adjustment where you put it.

Stops get wrenched constantly, so material choice affects how long they stay accurate.

With multiple options available, Ti22 has torsion stops for any budget, from lightweight aluminum to titanium for the ultimate in performance. Feature 1-3/4 Inch split. Aluminum stops include steel pinch bolt and adjuster bolt.

Chromoly stops include steel pinch bolt and steel adjuster bolt, and titanium models include titanium hardware. See below for upgraded titanium adjuster bolt.

SPECIFICATIONS

Material	Titanium
Finish	Natural
Fits Tube Or Axle	1-3/4 Inch Split
Vehicle Type	Sprint Car
Hardware Included	Hardware
Sold As	Each

WHAT'S INCLUDED

✓ Hardware
