Jacobs Ladder

14 in Long · Titanium Hardware Included · Chromoly · Black Powder Coat · Sprint Car

PART NUMBER
TIP2448
View on PriceGuidePro ›

OVERVIEW

The Jacob's Ladder locates the rear axle laterally and sets the roll center, making it one of the highest-leverage adjustments for how the car turns and takes off. Getting the pickup point right for the track conditions can be worth more than a spring change. Quick pin designs let you move that point in minutes instead of unbolting the assembly.

Lower mass here also reduces weight carried high at the rear of the car.

Ti22's Adjustable Jacob's Ladder has (3) pickup points at 5/8 Inch increments. This provides the ability to make adjustments according to varying track conditions.

SPECIFICATIONS

Material	**Chromoly**
Finish	**Black Powdercoat**
Product Length	**14 Inch**
Vehicle Type	**Sprint Car**
Hardware Included	**Titanium Hardware**
Sold As	**Kit**

WHAT'S INCLUDED
